

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-139. (Canceled)

140. (Currently amended) A method for making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) ~~at least one volatile solvent~~ isododecane;
- (ii) at least one polymer is chosen from polymers of following formula (I):

~~in which n denotes a number of amide units, such that the number of ester groups represents from 10% to 50% of the total number of ester and amide groups; R¹ is, in each case, independently an alkyl or alkenyl group having at least 4 carbon atoms; R² independently represents, in each case, a C₄ to C₄₂ hydrocarbonaceous group, provided that 50% of the R² groups represent a C₃₀ to C₄₂ hydrocarbonaceous group; R³ independently represents, in each case, an organic group provided with at least 2 carbon atoms, with hydrogen atoms and optionally with one or more oxygen or nitrogen atoms; and R⁴ independently represents, in each case, a hydrogen atom, a C₄ to C₁₀~~

~~alkyl group or a direct bond to R^3 or another R^4 , so that the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined by R^4-N-R^3 , with at least 50% of the R^4 groups representing a hydrogen atom;~~

in which

- n is an integer which represents the number of amide units such that the number of ester groups present in said at least one structuring polymer ranges from 10% to 50% of the total number of all said ester groups and all said amide groups comprised in said at least one structuring polymer;

- R^1 , which are identical or different, are each chosen from alkyl groups having at least 4 carbon atoms and alkenyl groups having at least 4 carbon atoms;

- R^2 , which are identical or different, are each chosen from C_4 to C_{42} hydrocarbon-based groups with the proviso that at least 50% of R^2 are chosen from C_{30} to C_{42} hydrocarbon-based groups;

- R^3 , which are identical or different, are each chosen from C_2 to C_{36} hydrocarbon-based groups; and

- R^4 , which are identical or different, are each chosen from hydrogen and C_1 to C_{10} alkyl groups, with the proviso that at least 50% of all R^4 are chosen from hydrogen;

- (iii) water;
- (iv) at least one coloring agent; and
- (v) at least one preservative.

141. (Canceled)

142. (Canceled)

143. (Canceled)

144. (Previously presented) The method for making up eyelashes according to claim 140, wherein said mascara further comprises PVP.

145. (Previously presented) The method for making up eyelashes according to claim 140, wherein said mascara further comprises a liquid fatty phase structured by said at least one polymer.

146. (Currently amended) A method for making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) ~~at least one volatile solvent~~ isododecane;
- (ii) at least one polymer chosen from ethylenediamine/stearyl dimer tallate copolymer;
- (iii) water;
- (iv) at least one coloring agent; and
- (v) at least one preservative.

147-153. (Canceled)

154. (New) The method for making up eyelashes according to claim 140, wherein the at least one polymer is chosen from ethylenediamine/stearyl dimer dilinoleate copolymer.
